

MAIL SERVICE PHARMACY

For Better Health Outcomes.

Our mail service pharmacy helps reduce the total cost of care while improving your employees' health. How? The convenience and ease of using mail service will help them stay on track with their medication therapy. And because we can dispense a greater days' supply of medication, our customers will likely be more compliant with their medications – and that can mean fewer doctor visits and hospitalizations.

Accurate and timely prescription refills that save money—that's the advantage of using UniCare's preferred mail service pharmacy.

UniCare is a WellPoint Company

Cost Savings—for You and Your Employees

Our mail service pharmacy may help save money on prescription drugs. Medications dispensed through mail service pharmacies are estimated to cost approximately 10 percent less than equivalent retail pharmacy prescriptions.¹ Plus, unless directed otherwise, we dispense generic medications, which usually cost 30 – 60 percent less than the brandname counterparts.

With mail service, your employees can also get more medication for less money. Our customers typically get a 90-day prescription for the same amount that two 30-day prescriptions would cost, if filled at a retail pharmacy.²

**Less frequent medication fills.
Reduced pharmacy costs.**

For more information about our mail service pharmacy, please contact your sales representative.

We're More than Just a Mail Service Pharmacy

Simple.

Our customers enjoy fewer trips to a retail pharmacy and services like refill reminders. And prescriptions can be ordered online, by phone or by mail. It's that simple.

Accurate.

You can feel confident that our mail service prescriptions are filled with a 99.99 percent error-free dispensing rate—and with the highest quality ingredients.

Each prescription is viewed by pharmacists and checked against the customer's prescription profile for drug allergies and interactions.

Convenient.

We provide free shipping and timely, front door delivery. And medications are shipped within seven days of receipt of a valid order—in unmarked, tamper-resistant and, if necessary, temperature-controlled packaging. On average, we process prescriptions in two days.³

At UniCare, we think that getting questions answered should be easy. That's why we stress one-on-one care and support. That includes individual counseling or prescription drug information from our pharmacists.

And if your employees have a question about their benefits or cost savings opportunities, our Customer Care associates are just a phone call away.
